

Nathan Hunter Design

Contemporary Organic

Organic form meets traditional craftsmanship in the Gazelle chair. The chair was designed to minimize its visual profile when pushed in – giving prominence to the surface of the table. When the chair is pulled out, its elegant contours are revealed. These contours are both visually appealing and functional, providing an unusual level of comfort in a dining chair. This design is available in a variety of wood combinations.

The Gazelle Chair™

Each piece of furniture is crafted for a specific customer. Talk directly with Nathan Hunter about creating a design that is focused on your needs and aesthetics.
